

## FITTING INSTRUCTIONS FOR RYCO CABIN FILTER RCA332P.

### HYUNDAI Elantra (XD)

1. The cabin air filter is located behind the glove box compartment.
2. Open the glove box and empty it of any stored items, it will make the job easier. Remove the inner clips located inside the compartment in the top section. These act as stoppers so the lid doesn't drop all the way down to the floor. The left side has a wire that is required to be unclipped from the box.
3. The cabin air filter housing can be seen at this point. Identify the lid and proceed to open it by pressing and pulling both bottom tabs.
4. Pull the old cabin air filter out and clean the area of any accumulated debris.
5. Insert the new cabin air filter facing in the correct air flow direction as indicated on the filter.
6. Refit all components in reverse order.
