

FITTING INSTRUCTIONS FOR RYCO FUEL FILTER Z756.

SUITS : CITROEN, FIAT, FORD, MAZDA, MINI, PEUGEOT, SUZUKI, VOLVO
 FILTER LOCATED IN ENGINE BAY, BACK RIGHT CORNER.

1: Fuel injection system elements in diesel engines are made with very strict tolerances and very little slackness. For this reason cleanliness is absolutely necessary during operating these elements.

2: Remove engine masking frame (A), disconnect air filter casing (B)

3: Remove electric connector of fuel heater (A), disconnect the quick connects of fuel filter pipes (B).

4: press filter safety mandrel, take filter out.

5: Remove heater element from used filter in direction shown in the drawing.

6: Remove safety plug from new filter.

7: Install fuel heater element in new filter.

8: Install filter in seat, remove safety , plug/connect fuel pipes (A), connect heater connector (B).

9: Pump the fuel with manual pump until resistance is felt.

10: Install air filter casing, connect flow meter, start engine, check system for leakage.

11: Fix engine masking frame.
