

FITTING INSTRUCTIONS FOR RYCO CABIN FILTER RCA303P.

VOLVO V40 (2013 - On)

1. The cabin air filter is located in the passenger footwell behind the centre console side trim. For better working space, slide the passenger seat all the way back.
2. Remove the side trim. The cabin air filter housing lid will be visible but not fully accessible. The main wiring harness tray may need to be removed to access the filter housing easily. There are two lock knobs at the front of the tray, twist them to drop the tray then unhinge it from the rear pivot points. Disconnect main connectors and move aside.
3. The cabin air filter housing is now accessible. Slide the old filter out carefully to avoid any accumulated debris from being spread around. Clean any remaining debris from the area. Slide the new filter in making sure it faces to the correct air flow direction (as indicated on the filter) and refit all components in reverse order.
