

## FITTING INSTRUCTIONS FOR RYCO CABIN FILTER RCA309P.

### MERCEDES BENZ Vito (W638)

1. The cabin air filter is located underneath the centre of the dashboard (just above floor level).
2. Remove the centre console that connects the dash to the floor (box shape) by unscrewing the two 10mm plastic bolts either side of the console.
3. Identify the two metal rods and a large black box, you may have to remove both rods for better access to the filter housing. Behind that box is the cabin air filter housing lid, handle carefully as it is only a thin piece of plastic.
4. Take the lid and slide it towards the passenger door to unhinge it and pull it out. Slide the old cabin filter out carefully as accumulated debris may come loose.
5. Clean the area well and insert the new cabin air filter in the right air flow direction as indicated on the side of the filter. Close the housing and refit all components in reverse order.
