

## FITTING INSTRUCTIONS FOR RYCO CABIN FILTER RCA300P.

### MITSUBISHI Colt (RG & RZ)

1. The cabin air filter is located in the passenger footwell below the glove box compartment.
2. Slide the passenger seat all the way back to allow for a working space. Get yourself in the footwell area and identify the plastic cabin air filter housing lid (see pic below).
3. The lid has one end that clips into the housing and the other end slides through a tab in the opposite corner of the housing (see arrow in pic below).
4. Unclip the housing lid by pulling the clip with your finger or if easier, use a flat screw driver. Once it is unclipped grab the lid and slide it out the securing tab.
5. Pull out the cabin air filter, clean the area of any accumulated debris and insert the new cabin air filter in the right air flow direction indicated on the filter.
6. Refit all components in reverse order.
