

RCA413M GENERAL FITMENT INSTRUCTIONS VOLVO X40 XZ Series B4204T & D4204T Engine

1. Locate the glove box at the passenger side inside the vehicle. Lower the glove box and unlash the two belts as shown in Fig. 1 (Note: You will need to hold the glove box to prevent it from falling down).

2. Undo the two clips (Fig. 2) on the lid behind the glove box, remove the lid to access the cabin filter housing from the blower assembly.

3. Remove the cabin filter housing cover by releasing the two tabs (Fig. 3).

4. Carefully remove the old filter from the housing (Fig 4.) to avoid accumulated debris from spreading around. Fit the new Ryco cabin air filter by ensuring the air flow arrow points downwards. Refit all components in reverse order and dispose of the used filter properly.
