### FILTER LOCKING AND UNLOCKING

- 1 The air filter housing is located next to the engine at the passenger side under the bonnet.
- 2 When removing the dirty filter, open the housing cover and unlock the filter by turning left and right rod 90 degrees downward toward the unlock symbol (left rod 90 degrees clockwise and right rod 90 degrees anti-clockwise)
- 3 Clean any debris inside the housing and then fit new Ryco filter with the two locking rods facing upwards towards the lock symbol. Lock the filter by pressing both rods until the filter locks. Close the housing cover and dispose the used filter properly.
