

RYCO FILTERS

FITTING INSTRUCTIONS FOR RYCO CABIN FILTER RCA237P.

NISSAN MICRO K12 (Filter is located behind glove box)

1. The cabin air filter is located behind the glove box in the passenger side towards the centre console. The glove box needs to be removed to be able to access the filter housing.
2. To remove the glove box compartment the lid has to come out first. Look for two pegs where the lid pivots when opened. Raise them out gently, and open the lid and remove it. Then remove all screws holding the compartment together and remove.
3. Identify the cabin air filter housing at the far end towards the firewall. Grab the lid and unclip from the top then pull the lid upwards to release the locking lug.
4. Slide the old filter out carefully to avoid accumulated debris spreading around. Clean area and insert the new filter making sure it is in the right air flow direction. Refit all components in reverse order.
