

# RYCO FILTERS

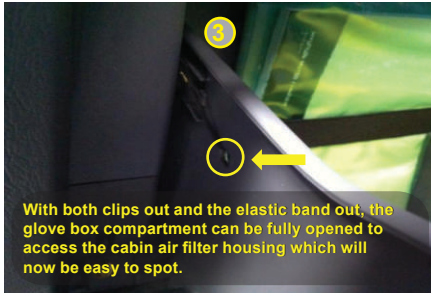

## FITTING INSTRUCTIONS FOR A HYUNDAI TUCSON ALSO FITS: KIA CERATO (TD) & SPORTAGE (KM) RYCO CABIN AIR FILTER RCA195P/MS/M

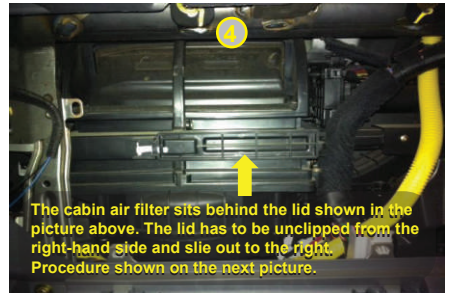

The cabin air filter is located behind the glove box compartment on the passenger side. Please follow these instructions to access and replace the cabin air filter.

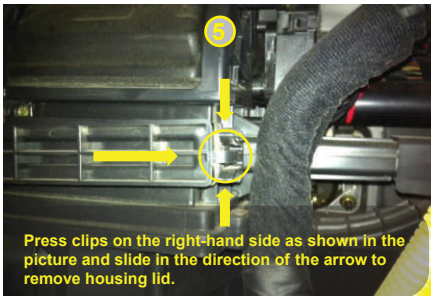

Open the glove box compartment. To the right there is an elastic band secured by a plastic clip, turn and slide through the opening. Then proceed to remove the plastic clip on both sides of the upper corners as shown. See picture 3 for a different view of the elastic band.

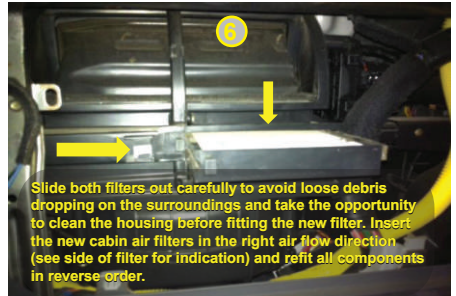

With both clips out and the elastic band out, the glove box compartment can be fully opened to access the cabin air filter housing which will now be easy to spot.

The cabin air filter sits behind the lid shown in the picture above. The lid has to be unclipped from the right-hand side and slide out to the right. Procedure shown on the next picture.

Press clips on the right-hand side as shown in the picture and slide in the direction of the arrow to remove housing lid.

Slide both filters out carefully to avoid loose debris dropping on the surroundings and take the opportunity to clean the housing before fitting the new filter. Insert the new cabin air filters in the right air flow direction (see side of filter for indication) and refit all components in reverse order.
