

RYCO FILTERS

FITTING INSTRUCTIONS FOR RYCO CABIN FILTER RCA137P. TOYOTA Kluger MCU28

Also fits: LEXUS IS200 (GXE10R) & IS300 (JCE10R)

1. The cabin air filter is located behind the glove box compartment. Follow the instruction to replace the element.

2. Before opening the compartment lid, the retaining lugs holding it in position need to be removed. With a flat screw driver lever the lug from its head out of the slot. Do the same with the other side. Once both are out, open the lid and slowly remove it.

3. The retaining lug looks like this once removed.

4. Once the compartment is removed, the cabin air filter housing is easily visible sitting on top of the blower fan. Unclip the lid from the location indicated in the picture above.

5. Grab the cabin air filter tray and slide it out slowly to avoid any loose debris from spreading around.

6. Clean the housing and the tray and then slide the new filter through the tray channel making sure the filter is facing in the right air flow direction. Refit all components in reverse order.
